Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussed about the proposed feature of "wherein the physical location information identifies a physical location of the wireless communication device" amended to proposed amended claims 1 and 17. The Examiner understood that the Applicants tried to proposedly amend independent claims 1 and 17 to over come the above cited references. However, the terms "geographic location information" is broad enough that the cited reference still read on it. Therefore, the Examiner disagreed that such proposed amendment is over come the cited prior art. However, the Examiner'd fully reviewed the specification and suggested the Applicants' Rep. that features described in Specification in paragraphs [0025], [0027] and [0035] are "hard-to-find-references" features which are not taught by the above cited references. In order to put the application in better condition for allowance, the Applicants are suggested to amend claims 1 and 17 with the above suggested features as issues for further consideration and/or searches.
